DOOM 404

LITEPAPER v1.0

GLITCH DETECTED

SOMETHING IS MISSING
FROM THE SYSTEM.

@DOOM404official

@DOOM404official

MORE THAN A MEME

DOOM404 begins as a community-driven token, but it is built around a bigger idea.

We believe there are GLITCHES in crypto, digital communities and, eventually, in how real-world ownership and value are represented.

DOOM404 exists to identify these GLITCHES, explore solutions and build useful tools with the community.

"**GLITCH DETECTED**
SOMETHING IS MISSING
FROM THE SYSTEM."

COMMUNITY FIRST

A strong and informed community is the foundation.

UTILITY NEXT

Build real tools around real problems.

ECOSYSTEM LATER

Explore broader applications as the ecosystem matures.

BUILD RESPONSIBLY

Be transparent about risks, limitations and development conditions.

02 // THE TOKEN

\$DOOM404

\$DOOM404 is a community token that powers participation in the DOOM404 ecosystem. It is designed to align creators, contributors and the wider community as utilities are developed over time.

PROPOSED TOKEN ALLOCATION

Subject to launch mechanics and final confirmation.

Allocation	Percentage	Purpose
Creator	5%	Platform/creator allocation (subject to launch platform rules)
Core Team	3%	Project development and operations (vesting to be confirmed)
Development Treasury	2%	Ecosystem development, infrastructure, security, legal/compliance and future applications
Community & Public Supply	90%	Community-driven distribution (via launch platform)

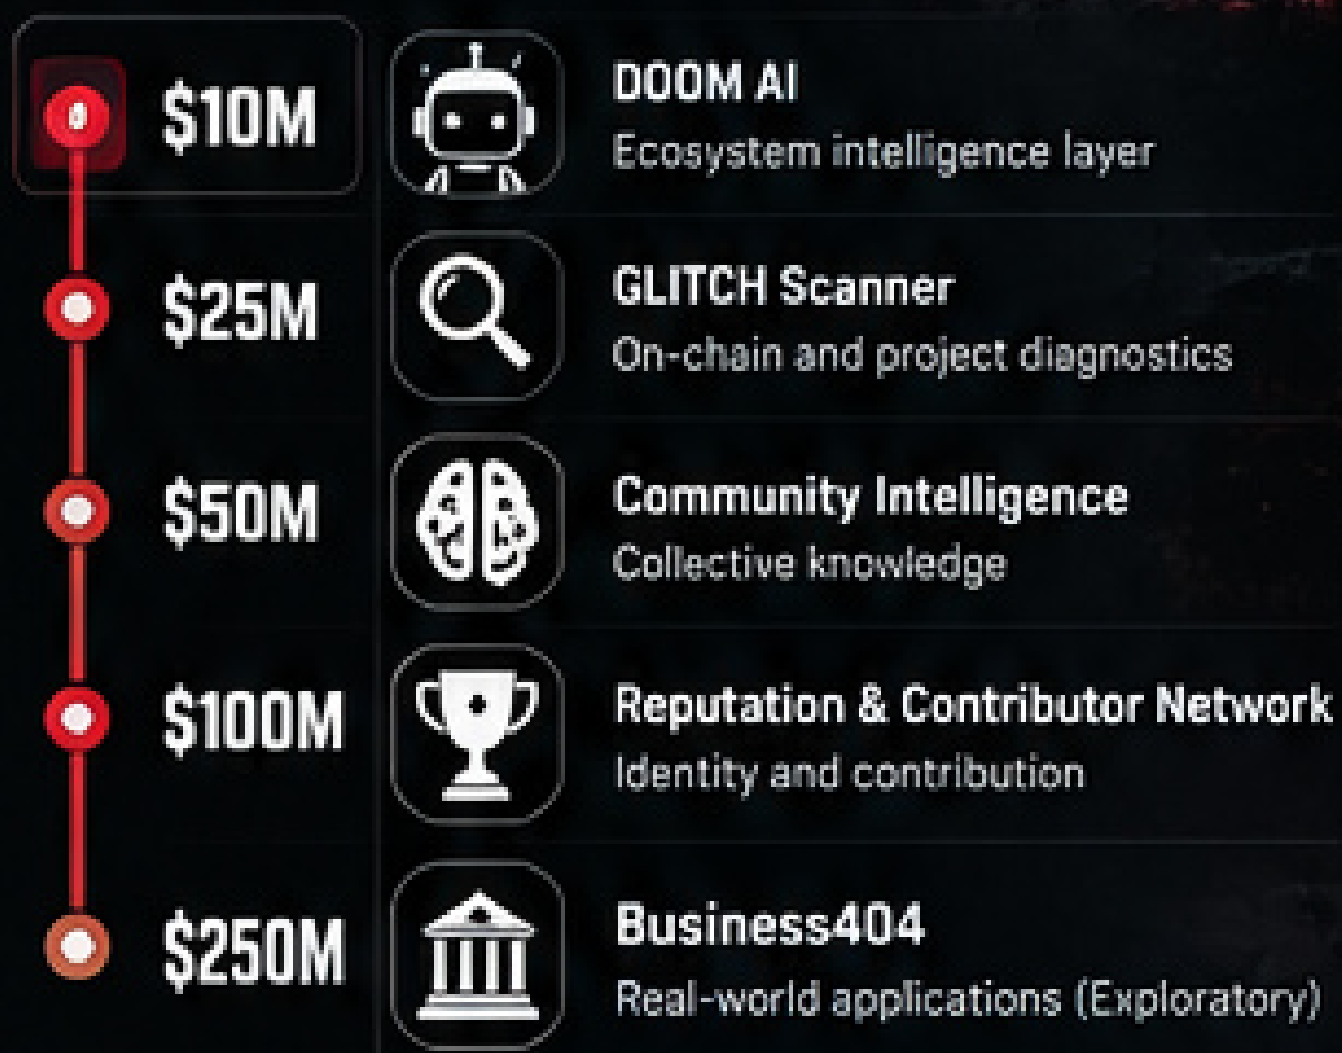

These allocations are **PROPOSED** and subject to the final launch mechanism. Exact mechanics, vesting and control arrangements will be confirmed before launch.

03 // THE UTILITY STACK

FROM GLITCHES TO SOLUTIONS

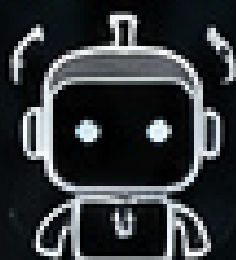

The DOOM404 utility stack consists of five progressive applications, each aligned with a market-cap development gate. These gates represent milestones for consideration and development — not automatic launch triggers.

"MARKET CAP OPENS THE GATE.
READINESS DETERMINES WHETHER WE WALK THROUGH IT."

DOOM AI & GLITCH SCANNER

\$10M DEVELOPMENT GATE

DOOM AI

PLANNED

Ecosystem Intelligence Layer

A DOOM404-specific AI agent that knows the ecosystem, understands community discussions, and acts as the interface to future applications.

- ✓ Answers questions about DOOM404
- ✓ Summarises proposals, updates and discussions
- ✓ Helps users navigate the ecosystem
- ✓ Identifies emerging GLITCHES in community activity
- ✓ Becomes the interface for future DOOM404 tools

\$25M DEVELOPMENT GATE

GLITCH SCANNER

PLANNED

On-chain and Project Diagnostics

A structured diagnostic tool to identify and present selected on-chain and project anomalies.

- ✓ Token and wallet analysis
- ✓ Holder distribution and concentration
- ✓ Unusual on-chain behaviour
- ✓ Liquidity conditions
- ✓ Project transparency indicators
- ✓ Community-reported concerns

COMMUNITY INTELLIGENCE & REPUTATION NETWORK

\$50M DEVELOPMENT GATE

COMMUNITY INTELLIGENCE

PLANNED

Collective Knowledge

Turn community observations, research and discussions into structured and searchable intelligence.

- ✓ Community observations and GLITCH reports
- ✓ Research submissions and analysis
- ✓ Discussion summaries and trends
- ✓ AI-assisted classification and organisation
- ✓ Not all submissions are verified facts
- ✓ Safeguards against manipulation

\$100M DEVELOPMENT GATE

REPUTATION & CONTRIBUTOR NETWORK

PLANNED

Identity and Contribution

Build a persistent reputation layer based on useful participation, not just token ownership.

- ✓ DOOM ID (wallet-linked identity)
- ✓ DOOM REP (contribution-based reputation)
- ✓ Missions and structured participation
- ✓ Contributor roles and recognition
- ✓ Potential future use in community governance

BUSINESS404

\$250M DEVELOPMENT GATE

BUSINESS404

Real-World Applications

EXPLORATORY

Explore whether blockchain-based technology can support compliant digital representations of defined business interests, rights or assets in small, unlisted businesses.

Potential Areas of Investigation

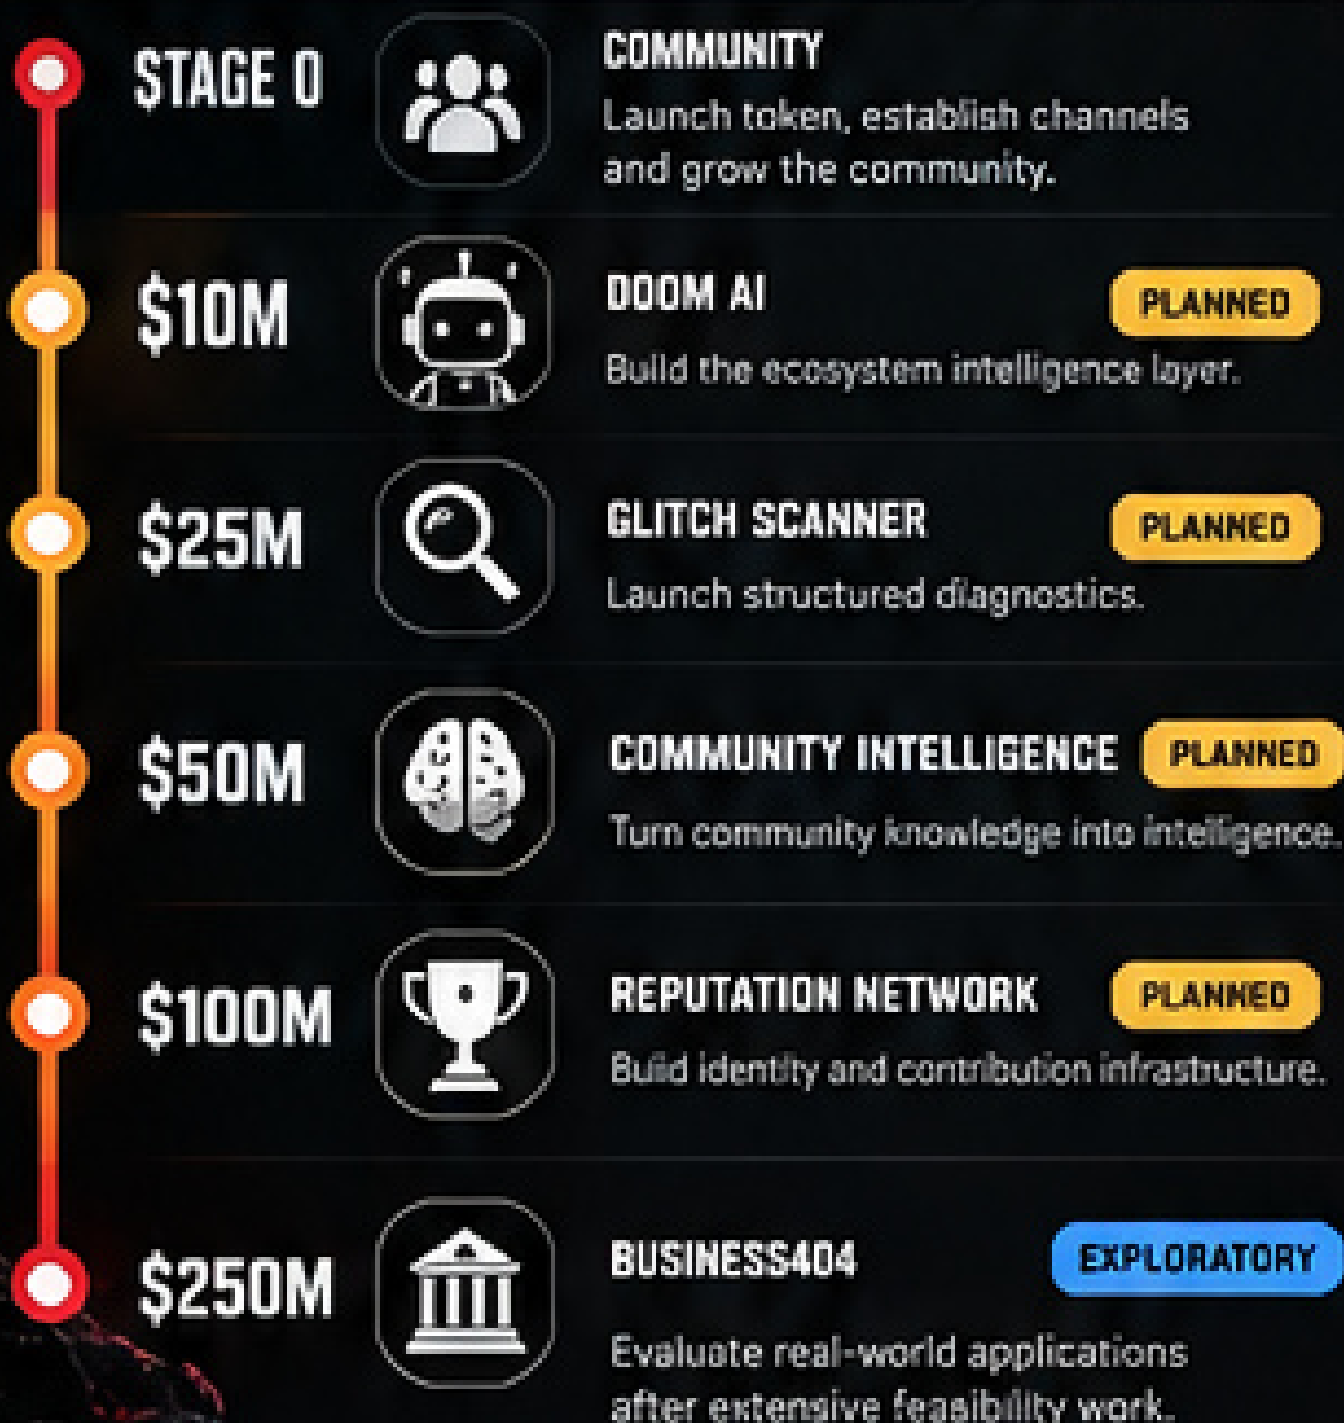

- ✓ Digital ownership records
- ✓ Tokenised economic or contractual rights
- ✓ Stakeholder participation
- ✓ Private-market infrastructure
- ✓ Business/community funding models

! IMPORTANT

- Business404 is **EXPLORATORY**.
- There are no tokenised securities, business ownership or investment products offered at this stage.
- Implementation would require significant legal, regulatory, technical and commercial development.

THE PATH FORWARD

A clear and structured roadmap, aligned with market-cap development gates and ecosystem readiness.

TRANSPARENCY & RESPONSIBILITY

MULTI-SOURCE DEVELOPMENT FUNDING

Development Treasury	2% allocation for ecosystem development (subject to governance and transparency)
Platform / Creator Revenue	Potential allocation from platform mechanisms
Utility Revenue	Future application-specific revenue models
Grants & Partnerships	Ecosystem grants and strategic collaborations
Community Funding	Community-approved, voluntary initiatives
External Capital	Potential future investment for specific applications

No development funding source is guaranteed.

KEY RISKS

-  **Market Risk** – High volatility and potential loss of value.
-  **Regulatory Risk** – Changing regulations and legal uncertainty.
-  **Technical Risk** – Development delays or technical challenges.
-  **Execution Risk** – Utilities may be delayed, changed or cancelled.
-  **Treasury / Key Management Risk** – Security of project-controlled assets. [faZeeta](#).
-  **Adoption Risk** – Utilities may not achieve expected usage.
